DUST BINDING FOR CLEAN
INDOOR ENVIRONMENTS

Njord Dust Binder

Effective dust binder for industrial floors that binds dust to the floor for simple cleaning.

Njord dust binders create a clean environment and reduce cleaning costs. A large portion of construction dust that leads to problems in warehouses, industrial sites and workshops comes from the floor. With Njord's proprietary dust binders, dust binds effectively to concrete floors and other types of hard floors. This dust is then easy to clean up, while at the same time a new dust-binding layer is laid over the floor.

Combined with Njord's air purifiers, this creates the cleanest possible environment, while also reducing cleaning costs. Used as part of daily cleaning on all types of hard floor material (concrete, stone, cement etc.). Binds dust and gives floors shine and improved friction. Our dust binders are water-based and do not have warning labels.

Advantages:

- Reduced need for cleaning, meaning lower cleaning costs.
- Easy and safe handling.
- Works optimally in combination with Njord air purifiers.

Characteristics:

- Binds dust to the floor for simple cleaning.
- Gives floors shine and improved friction.
- Water-based, no warning label.
- Effective dust binding for all types of hard floors.

Technical Specifications:

Contents: Water, soap, tensides, penetrants, complex binders, preservatives.

pH: pH 10.5 in concentrate and approx. 7.5 in washing solution.

Warning label: No warning label.

Shelf life: 1 year
