

CASE STUDY:
Klaus Baier / Pfronten, Germany

”It was the quality, the service, and the price-performance ratio that convinced us.”

In our daily work, we face specific challenges related to air quality. For example, oil mist is generated in the press shop, and in tool production, milling and grinding machines release coolant into the air, which negatively affects both health and the working environment.

Since we place great value on the health of our employees, it is important for us to have an air purification solution that ensures a cleaner and healthier work environment. After installing Njord air purifiers, we have noticed a clear improvement in air quality.

Bernd Schmeller, Facility manager
Klaus Baier GmbH / Pfronten, Germany

Measurements taken during maintenance have also confirmed this positive change in both of our production areas.

We chose Njord Clean Air because they were in the right place at the right time, but it was the quality, service, and price-performance ratio that convinced us. Working with Njord is straightforward, efficient, and reliable, and we can now focus on our production knowing that we have a cleaner and healthier working environment for our employees.

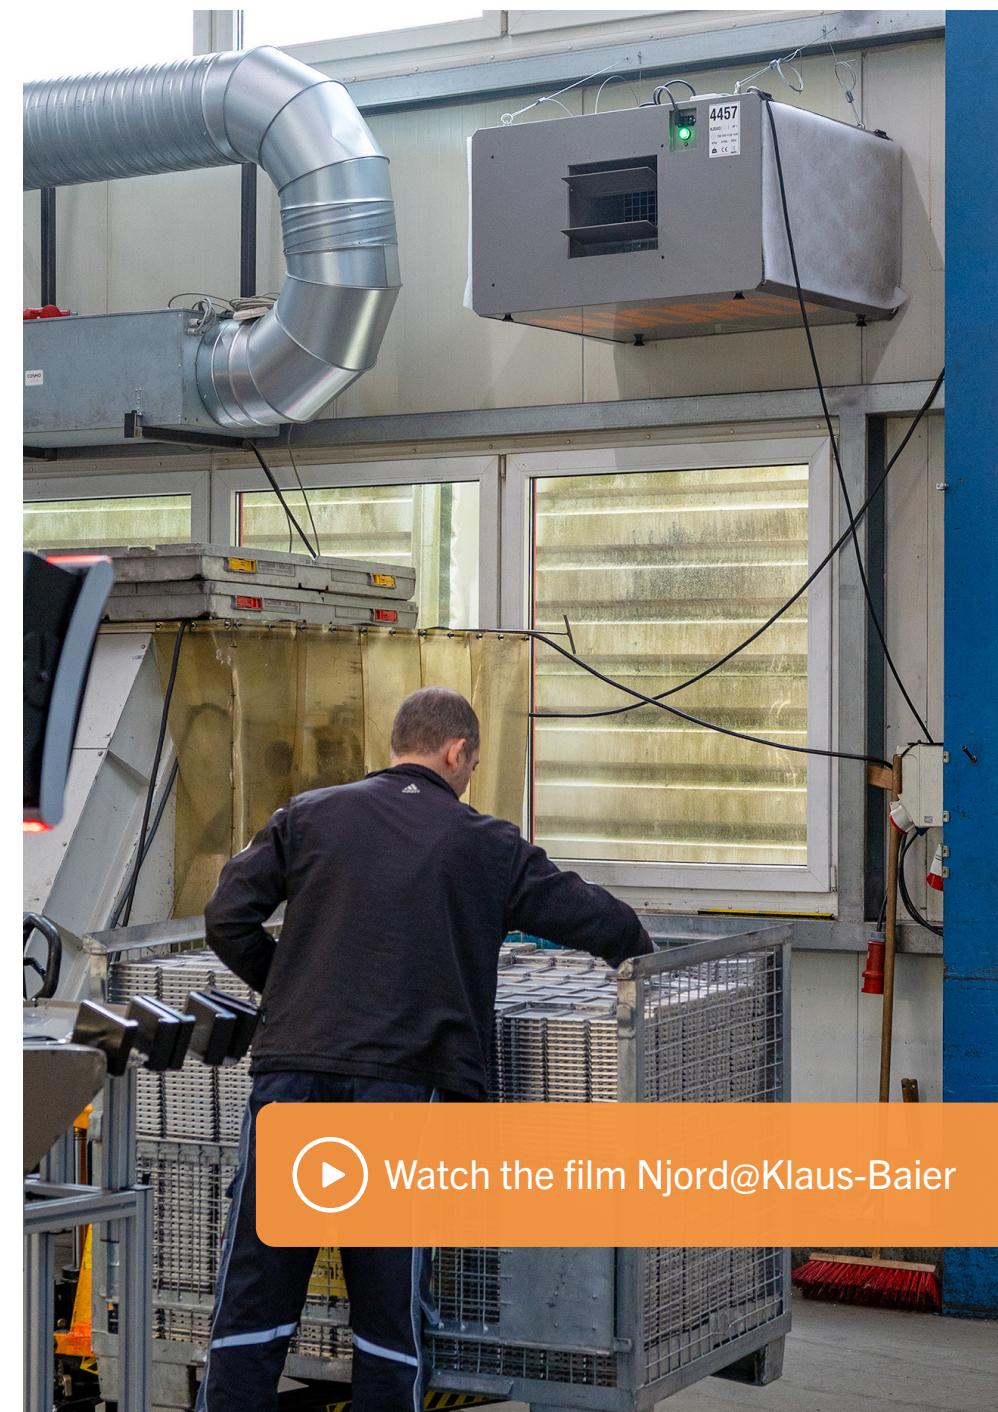

KLAUS BAIER
WERKZEUGBAU
STANZTECHNIK

Founded in 1963 in Pfronten/Allgäu, Germany, Klaus Baier GmbH specializes in toolmaking and stamping technology. With a strong focus on precision and quality, the company delivers customized tooling solutions and stamped parts for industries such as automotive and home appliances. Klaus Baier is certified according to ISO 9001 and ISO 14001, ensuring sustainability and efficiency across all production processes. www.klausbaier.de
