Njord XP-S

With its extremely compact design and dual filtration surfaces, the Njord XP-S, our smallest industrial air purifier, is efficient, easy to place, and ideal for smaller rooms and confined spaces.

Despite its very compact design, the Njord XP-S air purifier is equipped with two separate air intakes, each designed for two-stage filtration. The first stage consists of a pre-filter that effectively captures larger particles and dust. The second stage removes smaller particles, down to the finest and most harmful airborne contaminants.

With Njord Constant Flow™, the fan speed is automatically adjusted to ensure a constant airflow and maintain purification performance throughout the filters' lifespan. This guarantees a consistent supply of clean air, regardless of filter load.

The Njord XP-S is manufactured in Sweden from high-quality components with low environmental impact, including recycled aluminum. The air purifier can be ceiling-mounted, wall-mounted, or equipped with wheels for flexible floor placement. An optional support shelf can also be provided in materials of choice.

The Njord XP-S is additionally equipped with Njord Connect™, an integrated wireless control system that enables monitoring, control, and scheduling via WiFi or Bluetooth.

Designed for:
Rooms and confined spaces

Airflow at optimal operation:
1500 m³/h

Maximum airflow:
2200 m³/h

Air intake area:
0.48 m²

Installation options:
Ceiling, wall, or floor

Features:

Njord Connect™
Wireless control and programming via WiFi or Bluetooth.

Alarm function
The air purifier automatically alerts when it's time to replace the filters.

Energy-efficient, certified filters
High-quality filters certified according to ISO 16890 or EN 1822.

Njord Constant Flow™
Constant airflow with high separation efficiency – delivering the same amount of clean air at all times.

Filter class flexibility
Filter combinations tailored for optimal air purification and efficient operation.

Optional shelf
Can be supplied with a practical shelf.

Two-stage filtration
Dual filters for each air intake for optimal air purification.

Timer function
Programmable timer for different operating modes at different times.

Quick and easy installation
Completely standalone system that can be mounted on the floor, wall, ceiling, or placed on wheels.

Approved for sprinkler systems
Meets general requirements for ceiling installation under sprinkler systems.

Light and compact design
Extremely light and compact design
Weighs only 16 kg.

Plug and go
Connects to a standard power outlet (230 V).

Suitable for: Rooms and compact spaces; production rooms and workshops, offices, healthcare areas, hotels, schools, gyms, shops, etc.

Technical Specifications Njord XP-S

Airflow at optimal operation*:	1500 m ³ /h
Maximum airflow:	2200 m ³ /h
Air intakes:	2 (from two sides)
Total intake area:	0.48 m ² (2 x 0.24 m ²)
Two-stage filtration:	YES
Filter:	Up to H14 (ISO 16890 or EN 1822)
Dimensions (W×D×H):	300 x 460 x 800 mm
Weight:	16 kg
Electrical data:	230 V, 50/60 Hz, 1.3 A, EC motor
Motor power:	165 W
Power consumption at optimal operation**:	~ 90 W
Noise level:	30-55 dB(A)
Material:	Recycled aluminum
Installation options:	Ceiling, wall, or floor

*Air purification volume providing the best balance between efficiency, energy consumption, and noise level. **Depending on filter configuration.

Optional shelf

Can be supplied with a practical shelf.

Air outlet

Clean air outlet that can be configured for different air distribution solutions.

Two-stage filtration

Dual filters for each air intake for optimal air purification.

Light and sustainable design

Extremely compact and true lightweight unit made of recycled aluminum.

Standalone operation

Completely independent solution without connection to ventilation, heating, or cooling systems.

Dual air intakes

Optimized air intake openings on two sides, with a total intake area of 0.48 m².

Plug and go

Connects to a standard power outlet (230 V).

Energy-efficient operation

Energy-efficient technology and smart wireless control ensure optimal performance with minimal energy consumption.

Upgrades and accessories:

Njord UV-C

Elimination of harmful microorganisms using UV-C technology.

Njord Ionization

Reduction of unwanted odors using ionization technology.

Njord Safe-Zone™

Customized solutions for defined zones with clean and healthy air.

Njord Silencers

Noise-reducing units that lower airflow and fan noise.

Njord Connect™ ECO+

Optimized remote control of the air purifier with real-time data.
